## **DETAILED ACTION**

### ***Amendment***

1. Receipt is acknowledged of the Request for Continued Examination filed August 12, 2005 and the Amendment filed July 21, 2005.

### ***Allowable Subject Matter***

2. Claims 1-3 are allowable over prior art.

The following is an examiner's for allowance: Prior art teaches methods for detecting attempts at manipulatory intervention in a smart card. Prior art additionally teaches having sensors for detecting unauthorized attempts in a smart card. The above identified prior art of record, taken alone, or in combination with any other prior art however, fails to teach or fairly suggest the specific steps of the method for detecting attempts to intervene in a smart card as is disclosed claim 1 of the present claimed invention. The claimed method includes first using various sensors for detecting abnormal operating states, second, sensing an occurrence of an abnormal operating state by some of the sensors, and third, after the abnormal operating state has been sensed, but before triggering a countermeasure, either successively switching the sensors into a higher sensitization state, or successively activating more sensitive sensors. This claimed method is not found in prior art and moreover, one of ordinary skill in the art would not have been motivated to come to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
